Summary

A Flutter, React & Python developer, a software engineering student, love to design and develop apps and like to automate stuff with python.

A programmer, passionate about Machine Learning. A very fast learner, always learning and exploring new skills. A reader, and a business enthusiast.

I have been working on quite a few technologies, I have created some fun desktop and android applications in java, created some automation scripts and data analysis projects with python and have created and published a flutter app. Additionally, I have been working on Nextjs framework of React recently and have created some fun apps like a todo-list and amazon-clone web app with almost full ecommerce functionality.

I am currently working on Flutter and Nextjs to create some beautiful mobile & web apps.

Education

Mehran University of Engineering and Technology
Bachelor's degree, Computer Software Engineering
2017 - 2021

The University of Tokyo
Sakura Science Exchange Program, Information Technology
2019 - 2019

Skills

Flutter • React.js • Python (Programming Language) • Data Science • Android Development • Machine Learning • Software Development • Design • Photography • Video Editing
